#### **7R Tractors Overview**

All-New Larger Cab – Select from three packages so your cab works the way you work. Features include a new ergonomic seat, Generation 4 CommandCenter™ Display, improved suspension, and more.

New LED Lighting – Make the most of your time, no matter the time, when you choose from three Visibility Packages.

And with two times the LED light output compared to halogen bulbs, you can focus on the task at hand, not the amount of sunlight left.

**New Styling** – All-new exterior styling allows for more interior space compared to previous models.

#### **Integrated Intelligence:**

- CommandPRO™ Experience seamless control of your tractor and implements in the palm of your hand. Eleven configurable buttons keep you in command of your operation.
- StarFire<sup>™</sup> 6000 Receiver Faster planting, better accuracy, ultimate precision.
- **JDLink**™\* See where your machines are, what they're doing, and how they're performing with JDLink.
- AutoTrac<sup>™</sup> Enjoy hands-free turns and reduced overlap, all while maximising inputs and reducing fatigue.

\*Activation/subscription required. Some additional accessories and/or components may be required. JDLink requires a mobile connection to transfer information from machine to JDLink website. Consult your John Deere Dealer for coverage availability. Gen 4 Activations are machine specific activations that remain with the tractor. Free subscription to JDLink expires five years from date of purchase of qualifying 7R Tractor. This subscription will not be automatically renewed. To continue your subscription, you must actively renew and subscription fees shall apply.

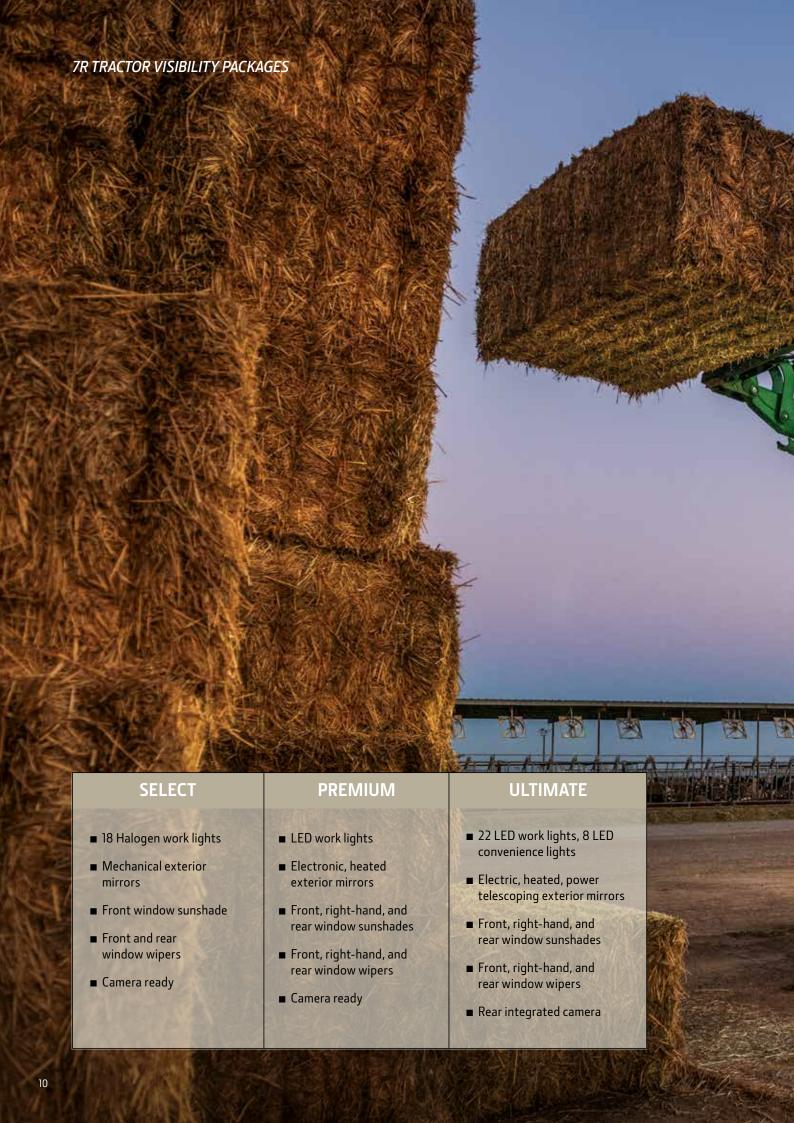

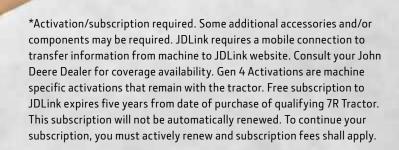

It's easier than ever to have a connected machine. All new 7R tractors come standard with JDLink™ and five years of connected service\* and capabilities, enabling you to easily benefit from technology-enabled machines.

By connecting through JDLink, you can wirelessly share information and plans with those who help you farm to make even better decisions. View reported work completed timely with Data Sync. Stay running in the field with help from your dealer using John Deere Connected Support™ and Remote Display Access. Keep track of your operation anytime and from anywhere from a desktop computer or a mobile device with John Deere Operations Center and MyOperations™ mobile app.

The primary user interface with the 7R Tractors is the Generation 4 CommandCenter™ Display for added productivity while boosting your confidence to make every pass more efficient.

Get started faster with more precision, less calibration and faster pull-in time with the integrated StarFire™ 6000 Receiver and SF3 signal. Precision Ag is built-in the tractor with AutoTrac™, Documentation, and Data Sync unlocked and ready for use. Find out more about all our latest technology including John Deere Operations Center at JohnDeere.com.au/7R or JohnDeere.co.nz/7R.

# Shift into high gear

## The power-driven support you need

With a rear hitch capacity of 7,847 kg, you're set to pull large planters, and the optional front hitch has operations covered with front-mounted implements. A fully independent, 45-mm (1-3/4 in), 1000-rpm PTO is standard equipment and specially designed for high-power, heavy PTO loads. Get added load-bearing strength to handle large-capacity and extra-wide implements with an optional Category 4 drawbar.

The heavy-duty hydraulic system boasts plenty of reserve capacity to operate large hydraulic motors, even at reduced engine speeds. Triple Link Suspension (TLS™) delivers electro-hydraulic automatic engagement and give you the drawbar pulling power you need in all operating conditions with reduced power hop.

## The connected support you need

When you're running, you don't want anything to slow you down. Your 7R Tractor comes with five years of JDLink connected service.\* Once activated, your John Deere dealer can offer John Deere Connected Support™ services such as Remote Display Access and Service ADVISOR™ Remote, allowing your dealer to "dial in" to your tractor's diagnostic data and assess trouble codes to help you avoid downtime.
