

DELTA SLASHERS

Manoeuvrable, strong & reliable

GASON[®]

GASON Delta Slashers

Gason VHD Delta Wing Slashers are Australian made and designed for contractors, orchardist and government users requiring an easily manoeuvrable, dependable and reliable machine.

Both models hydraulically fold for narrow road transport of 2.5m. Driveline componentry, deck construction and wear points are easily serviceable and designed to meet demanding conditions.

The Very Heavy Duty (VHD) Delta Wing utilised industrial grade componentry. This machine is a heavy duty and multi-tasking machine by design, utilising years of Chris Grow and Gason ingenuity.

Notes:

Delta Slasher Specifications

Models	Cut Width	Variations
Delta 15	4.57m	Rear throw (Slashing)
Delta 20	6.1m	or dual mulch throw (Orchard)
