JOHN DEERE
GOLF

The Comprehensive Golf Course
Management Software

A man with short dark hair, wearing a blue patterned short-sleeved shirt under a grey vest, is seated and looking down at a black smartphone in his hands. He is wearing a black smartwatch on his left wrist. The background is a blurred indoor setting with large windows and a plant. A newspaper and a glass of iced tea are on a table to his right.

***WHEN ALL YOUR DATA IS IN ONE PLACE,
YOU CAN BE ANY PLACE.***

Connect. Guide. Manage Like Never Before.

Pulling in data from your John Deere PRO Golf network—and other integrated third-party software—John Deere PRO Golf allows you to keep track of:

- Staffing, crew hours, and overtime
- Equipment maintenance schedules
- Irrigation costs
- Weather updates
- And much more

Real-Time Decision-Making

With one hub for all your data, you can make informed decisions in real-time, improving efficiency, lowering costs, and becoming more sustainable, no matter where you are.

Fully Customisable Dashboard

John Deere PRO Golf gives you the ability to enter additional data such as soil moisture, water usage, and greens speed. John Deere PRO Golf also integrates with these industry software solutions to simplify—and even automate—data entry:

- **Playbooks**—Fertiliser and chemical costs, product inventory
- **POGO**—Soil moisture, EC and Soil temperature readings
- **Foretees**—Rounds played with player details
- **Spectrum Technologies**—Soil moisture, EC and Soil temperature readings
- **The Weather Company**—Current and forecast conditions

Labour Management

Leading your crew has never been easier. From any device you will be able to assign work, make adjustments on the go and view labour reports. Your people are your most powerful resource, so make the most of what they bring to the table with John Deere PRO Golf.

Effortless Workboard Updates

No more whiteboards. Adjust staffing needs or job assignments easily on the digital workboard, with your team able to remotely access new updates.

Real-Time Crew Communication

With John Deere PRO Golf, your crew can see their assigned work right from their mobile phone—personalised to them—so they always know where they need to be.

Manage Staffing Costs

With alerts and color-coded indicators, you'll know when overtime hours/costs are approaching your budget thresholds and can act quickly.

Real-Time Reporting

Gain great insight into how efficiently the operation is running with automated reports for dollar allocations, man-hours, and even overtime, all easily exported to Microsoft Excel.

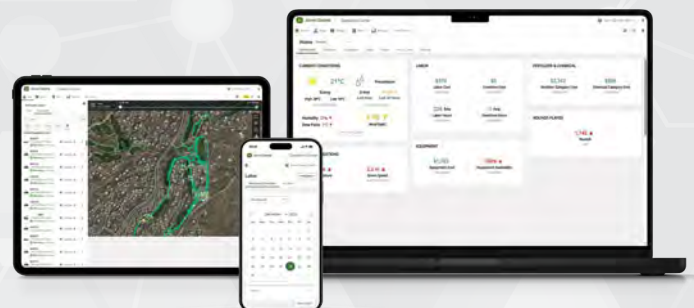

One Fully Integrated Dashboard. It's All Here.

When you combine labour, equipment, weather, and even your soft goods and soil temperatures, you can make data-driven decisions to manage your entire operation like never before.

That means:

- More cost-effective use of labour and equipment resources
- Real-time decision-making so you can make adjustments quickly
- The control to know that you're always on top of your course management

And it's all customisable to work the way you do, no matter where you're working.

Fleet Management

The quality of the equipment is half the battle. The other half is managing it efficiently. John Deere PRO Golf gives you the data to do just that so you can monitor maintenance schedules, engine hours, location history, and more.

Scheduled Maintenance and Repairs

Stay on top of equipment maintenance with up-to-date schedules for John Deere equipment, plus easily added on-demand work orders for any make equipment. Your equipment manager or technician will have all the information they need to keep your fleet running in peak condition.

Maintenance Schedule Monitoring

Upcoming services are colour-coded, helping you prioritise work within the shop and take command of your fleet maintenance.

Engine Hours Update

Balance equipment usage across the entire fleet by quickly and easily updating equipment engine hours from any internet connected device.

Parts Inventory Connectivity

Parts inventory is now seamlessly integrated with your process. John Deere PRO Golf automatically logs which parts you use, alerts you when inventory is low, and connects you with the John Deere online parts catalog.

Reports

Real-time automated reports mean you'll always know the status and performance of your equipment, from equipment use and availability to cost of ownership, all easily exported to Microsoft Excel. With this data, you can make better decisions on purchasing or leasing, fleet size, and more.

Connected Machines

With John Deere PRO Golf, you'll know where your equipment is, where it's been, and how long it's been running so you can operate at peak efficiency.

Equipment Location

Monitor performance, progress, and location of your JDLINK™ modem equipped fleet from any internet connected device. Now you can make more informed decisions about the day's activities, identify opportunities for adjustments and improve efficiency.

Location History

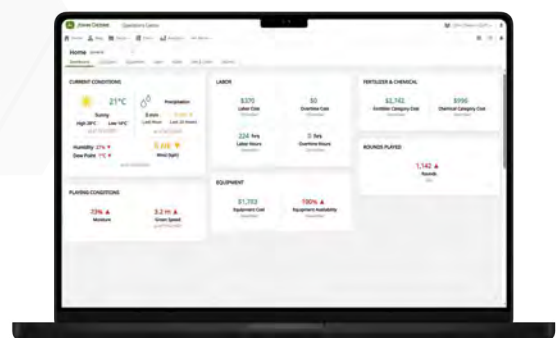

Colour-coded location history information gives you insights to identify areas of concern and opportunities for efficiency improvements such as route planning, operator training, and more.

Automatic Engine Hour Updates

Engine hours within the fleet page update in real-time with the use of machine installed JDLINK modem, eliminating the need for time-consuming manual entry.

Enhanced Dealer Support

New to John Deere PRO Golf, now you can give your dealer permission to view your equipment data and help with maintenance strategy. This brings a new level of expert support to your operation.

OnLink joins the John Deere Operations Center™ suite of digital tools as John Deere Operations Center™ PRO Golf.
